Full-Stack Software Developer

Resourceful professional with a multilayered background in web design, back-end and front-end development. Energized when problem-solving with a collaborative team, and creating user-friendly applications with both static and dynamic content. Adores coffee, dogs, and the great Pacific Northwest.

Technical Skills

Languages: JavaScript, HTML5, CSS3 **Libraries & Frameworks:** React, Node.js, Express.js, Material-UI, TailwindCSS **Testing:** QUnit, Jest, Supertest, React Testing Library **Databases:** SQL, PostgreSQL

Dev Tools: Git/GitHub, Postman, PGAdmin, Heroku, Netlify, VSCode

Other: Test Driven Development, Remote Development, Mob and Pair Programming

Projects

BeatWavez | [GitHub](#) + [Deployed Site](#) | Javascript | React | Node.js | SQL | Socket.io | Material-UI

Full-stack karaoke party app that allows users to create and join rooms, manage a queue, chat, and sing with videos pulled from YouTube API. I advocated for a responsive design by utilizing the Material-UI library, designing the login page with dynamic rendering, and writing javascript functions to generate room names.

Pixel Pusher! By st-ART-up | [GitHub](#) + [Npm](#) | Express | Node.js | SQL | Blessed | CFonts | Chalk

Visual art application that enables users to unleash their colorful creativity on a canvas in the terminal using only back-end technologies. One main feature I designed was the terminal scrolling title screen that gave the users a retro 90's command-line game feel using Javascript functions through Node.js.

RobinFood - Meal Prep for the Masses | [GitHub](#) + [Deployed Site](#) | Javascript | HTML | CSS

Designed for busy people who want to eat healthier, made-from-scratch meals. I championed initializing custom recipe templates, by using template literals to create an interactive user experience. I optimized the home page with a dynamic auth login/logout form to store each user data in local storage.

Experience

Lead Banquet Server/Bartender | The Nines Hotel - Portland, OR | October 2015 - June 2020

Promoted to Lead Server in 2018. Made improvements with the team I lead to elevate the excellent customer service we were already known for. Responsible for a team of 5 to 20 servers depending on the event sizes, varying from 20-600 guests. Achieved the 2019 Quarter 2 Front of the House Employee Award for my guest satisfaction, teamwork, and leadership skills.

Education

Full-Stack Software Developer | Alchemy Code Lab - Portland, OR | January 2021 - June 2021

800+ hours of intensive, full-stack software engineer training. Emphasized collaboration in all remote teams, with multiple week-long remote project sprints focusing on group collaboration, TDD, planning, MVP deadlines, and app deployment.
