Full-Stack Software Developer

Resourceful professional with a multilayered background in web design, back-end, and front-end development. Energized when problem-solving with a collaborative team and creating user-friendly applications with both static and dynamic content. Adores coffee, dogs, and the tech community.

Technical Skills

Languages: JavaScript, HTML5, CSS3 **Libraries & Frameworks:** React, Node.js, Express.js, Material-UI, TailwindCSS **Testing:** QUnit, Jest, Supertest, React Testing Library **Databases:** SQL, PostgreSQL
Dev Tools: Git/GitHub, Postman, Beekeeper Studio, PGAdmin, Heroku, Netlify, VSCode
Other: Test Driven Development, Remote Development, Mob and Pair Programming

Projects / Hackathons

Quick on the Draw | [GitHub](#) + [Deployed Site](#) | Javascript | React | TailwindCSS | Netlify

Quick on the Draw is an app to encourage people to take breaks by giving them a fun, timed drawing activity to take their minds off of work. This app was built over 5 days as part of a Mintbean.io hackathon. We earned two awards, the Mintbean star, and certificate of completion. I created dynamic reusable components for the paint colors and brushes and others, incorporated TailwindCSS to create the overall styling, and built the React components and layout of the canvas drawing page.

Toadlly Legit Quiz | [GitHub](#) + [Deployed Site](#) | Javascript | React | TailwindCSS | Supabase

Fun full-stack web app for users to answer quiz questions to find their spirit frog, new hobbies to explore, and how to join their new hobby communities. Built in a 24-hour sprint for the Road to Code Hackathon, I used TailwindCSS to style the quiz and overall look of the app, researched and built out the hobby dataset, and created multiple React components.

BeatWavez | [GitHub](#) + [Deployed Site](#) | Javascript | React | Node.js | SQL | Socket.io | Material-UI

Full-stack karaoke party app that allows users to create and join rooms, manage a queue, chat, and sing with videos pulled from YouTube API. I advocated for a responsive design by utilizing the Material-UI library, designing the login page with dynamic rendering, and writing javascript functions to generate room names.

Experience

Lead Banquet Server/Bartender | The Nines Hotel - Portland, OR | October 2015 - June 2020

Promoted to Lead Server in 2018. Made improvements with the team I lead to elevate the excellent customer service we were already known for. Responsible for a team of 5 to 20 servers depending on the event sizes, varying from 20-600 guests. Achieved the 2019 Quarter 2 Front of the House Employee Award for my guest satisfaction, teamwork, and leadership skills.

Education

Full-Stack Software Developer | Alchemy Code Lab - Portland, OR | January 2021 - June 2021

800+ hours of intensive, full-stack software engineer training in Javascript and React. Emphasized collaboration in all remote teams, with multiple week-long remote project sprints focusing on teamwork, TDD, planning, MVP deadlines, and app deployment.
